

EMPOWER THE POWER OF OEM WITH XIAOMI

Xiaomi as an OEM

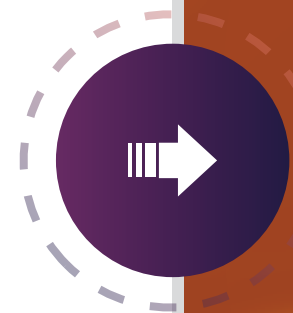

OEM – Original Equipment Manufacturer

In the smartphone industry, OEM is the entity that designs and manufactures the mobile devices with their own defined technicalities and in-built features such as Xiaomi.

Benefits of Xiaomi as an OEM:

- New-age solution
- Determines the usage of mobile device
- Best advertising platform
- Contributing aspect in the growth of mobile app ecosystem

At Xapads, we understand the significance of OEM for mobile campaign performance and help marketers with trusted and transparent solutions with optimal data insights for wider reach and maximising results.

Preload Apps

Xiaomi's OEM comes equipped with a set of licensed and already installed apps inside a smartphone called Preload Apps (pre-installed apps).

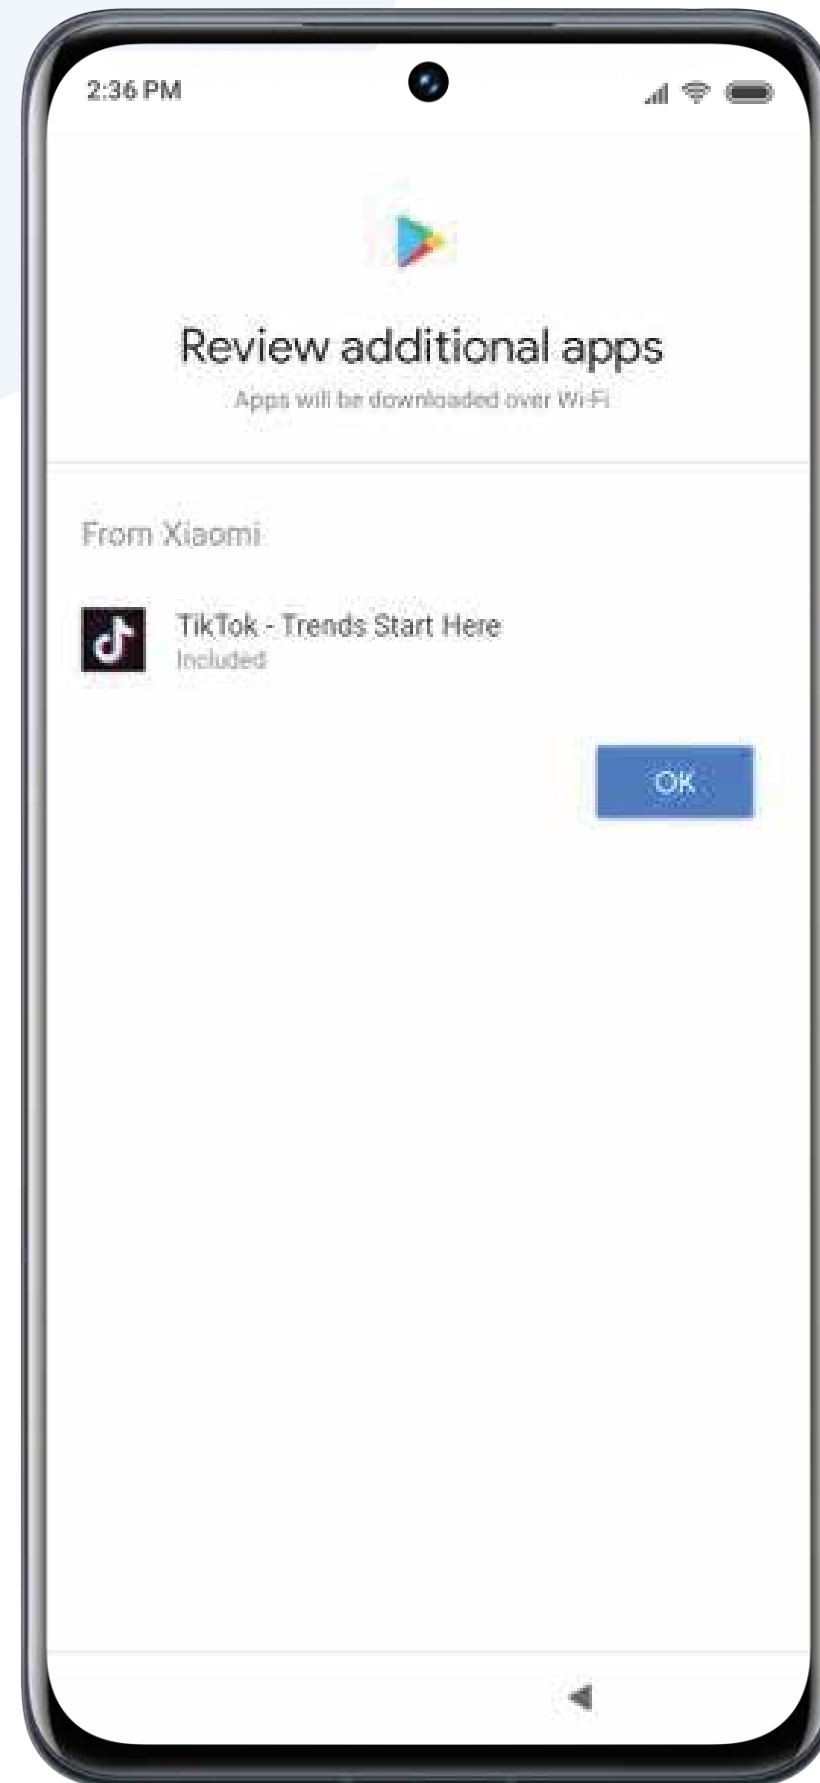

- Great way of introducing apps to new users having OEM inventories
- Provides consumers with easy navigation and user flows
- Offers the comfort of using apps
- Drives quality results and conversion rates

In OEMs, preloaded apps are a kind of ad placement that help marketers to make informed business decisions based on users' choices & app preferences.

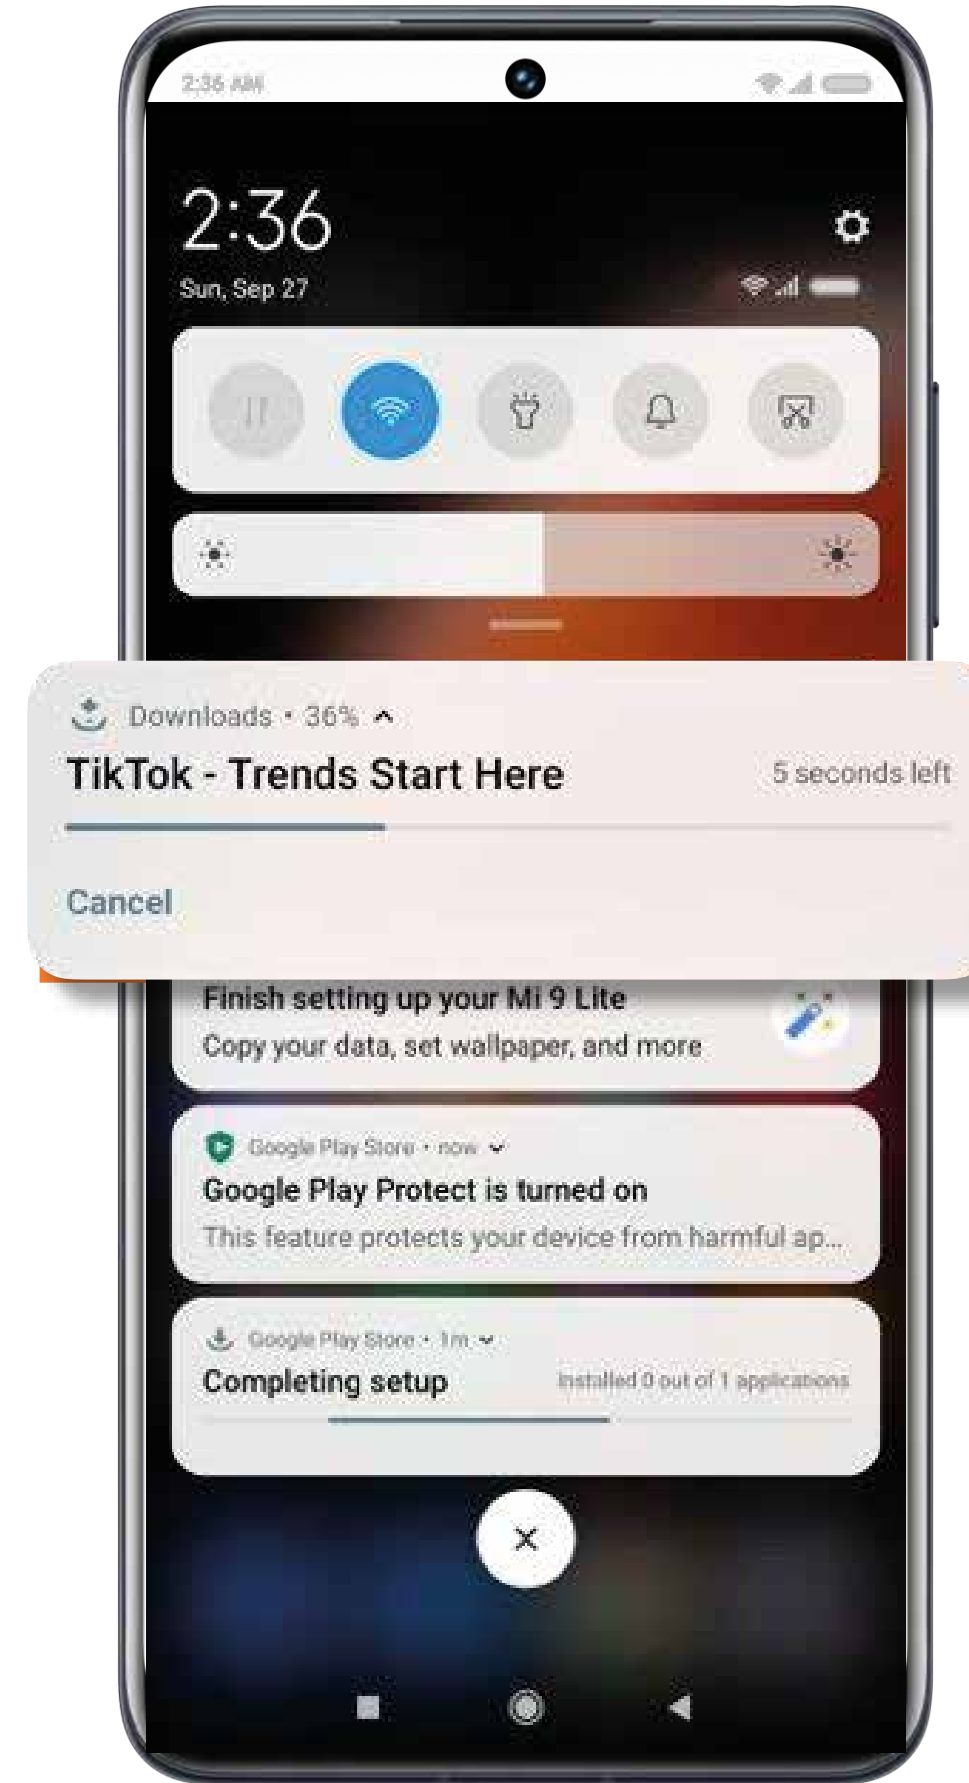

AI Preload

It's Xiaomi's feature which determines the frequently used apps by the user via Artificial Intelligence. It reduces the app loading time while analysing the users' sessions of opening & closing the app and automatically opens it in the background.

AI Preload Via PAI

Google has a functionality on Android called PAI (Play Auto Install) which allows users to download apk from Play Store.

OEMs pre-install apps inside smartphones during the device manufacturing process. PAI helps in attributing preload apps on OEM inventories and enables marketers to reach the target audience without executing online campaigns.

PAI (Play Auto Install)

PAI is a tool made available by Google to automatically download apps from Play Store

When is PAI triggered?

On models where PAI is configured:

STEP 1: First boot-up or boot-up after factory reset

STEP 2: Connect to the network
